SUMMARY OF EXPERTISE

I am a board-certified Emergency Medicine physician currently practicing in Massachusetts. After completing ACGME accredited residency in Emergency Medicine, I worked as a staff physician and Assistant Professor of Emergency Medicine in Detroit, MI, and Worcester, MA. Currently, my practice locations include both academic and community settings. I have experience with education, research, and providing local and national presentations. I currently peer review articles submitted for publication in the Western Journal of Emergency Medicine (WestJEM).

As an expert witness, I have experience working on medical malpractice cases active throughout the United States, and can provide services involving affidavit of merit, chart review, written report, deposition, trial testimony, and cross-examination preparation. I make an intentional effort to provide my opinion in clear and understandable terms with the goal of educating the judge and jury about the medical basis for the facts of the case, as they relate to negligence, causation and damages.
