SUMMARY

Award winning roadway safety thought leader. Has conducted numerous research projects involving road safety. Widely published in peer reviewed literature. National and international speaker on roadway safety. Serves on key national committees dealing with roadway safety. Hands-on experience designing a wide variety of highway and intersection improvements. Registered professional engineer in more than fifteen states. PhD in Civil Engineering with a focus on highway safety from Worcester Polytechnic Institute.

DETAILED BIOGRAPHICAL SKETCH

Dr. Carrigan has been active in transportation engineering for more than 25 years. She received her undergraduate degree in Civil Engineering from Worcester Polytechnic Institute in 1997 and began her career in civil engineering as a highway designer joining a Massachusetts consulting firm. Dr. Carrigan later joined the Massachusetts Highway Department then later a second highway design consulting firm. She was responsible, during these engagements, for the design of highway geometric improvements; the design of highway reconstruction and maintenance projects; the design of signalized and unsignalized intersections and interchanges; the preparation of temporary traffic control plans; construction and maintenance inspection; and preparation of contract documents. Dr. Carrigan has a wide variety of highway design, construction, and maintenance experience.

Dr. Carrigan gained close to ten years of practical design and construction experience before earning a Master of Science degree in 2008 and a PhD in 2010 from Worcester Polytechnic Institute in Civil Engineering with a focus on roadside and highway safety.

Dr. Carrigan formed a research consulting business with two partners in 2010 and has subsequently been almost exclusively focused on roadside and highway safety research. Dr. Carrigan has or is currently conducting research funded by the National Academy of Science's National Cooperative Highway Research Program (NCHRP), the Federal Highway Administration (FHWA), and a variety of other government and industry sponsors.

Dr. Carrigan's active research interests include the development of models from crash data to represent the effect of design changes on crash frequency and severity; the in-service performance of roadside features and hazards; the development of roadside

design guidance; the risk-analysis of highway and roadside designs; the development of cost-effective and risk analysis design tools, and in-service performance studies of roadside hardware.

Dr. Carrigan has developed design guidance for inclusion in publications such as the AASHTO Roadside Design Guide and the AASHTO LRFD Bridge Specification. She has developed models for quantifying crash frequency and severity for inclusion in the AASHTO Highway Safety Manual. Dr. Carrigan co-authored NCHRP Report 892 providing guidance for shielding bridge piers and NCHRP WO Document 307 which provides guidance for the selection of bridge rails. She co-authored NCHRP WO Document 292 which provides guidance for replacing roadside hardware and documented the FHWA study on the in-service performance of terminals. Dr. Carrigan is the lead author of NCHRP Report 996 on the selection and placement of median and roadside barriers. She is a co-author of NCHRP Report 972 which updated the guidance available through the AASHTO Roadside Design Guide. Dr. Carrigan is the lead author of NCHRP Report 1010 which provides guidance for evaluating the field performance of roadside hardware and is currently the principal investigator for several related NCHRP projects on the field performance evaluation of roadside hardware.

She is a member of the Transportation Research Board Committee on Roadside Design. She is the chair of the In-Service Performance Evaluation (ISPE) subcommittee. Dr. Carrigan is the past-president of the Maine Society of Professional Engineers and is a registered professional engineer the States of Arizona, Connecticut, Florida, Hawaii, Illinois, Indiana, Maine, Massachusetts, Mississippi, New York, New Mexico, North Carolina, Ohio, South Carolina, Texas, Washington, and West Virginia.

PROFESSIONAL FOCUS

In-service performance evaluations of roadside hardware, probability concepts in highway safety; development and use of crash-based and encroachment-based models in highway and roadside safety; risk and cost effectiveness analysis of design alternatives; design and evaluation of geometric and roadside improvements; and development of roadside design guidance.

EDUCATION

- Ph.D in Civil Engineering, Worcester Polytechnic Institute, Worcester, Massachusetts (2010).
- MS in Civil Engineering, Worcester Polytechnic Institute, Worcester, Massachusetts (2008).
- BS in Civil Engineering, Worcester Polytechnic Institute, Worcester, Massachusetts (1997).

HONORS

- AFB20 Best Paper Award, *Using Risk Analysis to Minimize Adverse Consequences in Non-Standard Designs* by Malcolm H. Ray and Christine E. Carrigan (2015)
- AFB20 Volunteer of the Year (2014)

CV, Christine E. Carrigan, P.E., Ph.D.

CERTIFICATION

- Local Project Administrator

SERVICE

- Maine Society of Professional Engineers – (Past President, May 2023-Present)
- Transportation Research Board -- Subcommittee AKD20(3) In-Service Performance Evaluation (Chair, November 2020 - Present).
- Maine Society of Professional Engineers – (President, May 2022-May 2023)
- Transportation Research Board -- Roadside Safety, Committee AFB20 (Member, April 15, 2019-April 14, 2025). Renamed AKD20 in April, 2020.
- Transportation Research Board -- Highway Safety Performance, Committee ANB25 (Friend, 2013 – present).
- Lake Anasagunticook Association – Board Member (Director, 2019 – June 2022)
- Maine Society of Professional Engineers – (President Elect, May 2021-May 2022)
- Transportation Research Board -- Geometric Design, Committee AFB10 (Member, 2012-April 14, 2022). Renamed AKD10 in April, 2020.
- Maine Society of Professional Engineers – Board of Directors (Director, May 2019 – May 2021)
- NCHRP 20-05/Topic 50-04, “Utility Pole Safety and Hazard Evaluation Approaches” (Panel Member, 2018-2019).
- Transportation Research Board -- Roadside Safety, Committee AFB20 (Friend, 2009 – April 15, 2019).
- Transportation Research Board -- Standing Committee on Utilities, Committee AFB70, (Utility Task Group, 2014 – 2018).

CV, Christine E. Carrigan, P.E., Ph.D.

CURRENT PROFESSIONAL MEMBERSHIPS

- American Society of Civil Engineers
- National Society of Professional Engineers
- Maine Society of Professional Engineers

EXPERIENCE

- 2010-Present: Partner, RoadSafe LLC, Canton, Maine:** Perform research, consulting, and litigation support in the areas of roadside and highway safety. Conduct in-service performance evaluations (ISPEs) of safety features. Apply probability concepts in roadside and highway safety for the reduction of run-off-road crash frequency and severity. Develop and use crash-based and encroachment-based models for risk and cost effectiveness analysis of design alternatives. Develop design and assessment guidance for incorporation into transportation agency design, construction, and maintenance manuals. Design and evaluate highway and roadside improvements. Assist municipalities in the design, construction, and administration of road projects.
- 2007-2010: Adjunct Instructor of Civil and Environmental Engineering at the Worcester Polytechnic Institute, Worcester, MA:** Taught classes in the areas of transportation engineering, computer aided engineering, and construction management.
- 2001-2005: Project Engineer at Vanasse, Hangen, Brustlin, Inc., Springfield and Watertown, MA:** Designed highway improvement and signalization projects in rural, suburban, and urban areas, balancing the conflicting requirements of established design standards and limitations of available land. Prepared permit documents for new interchange construction. Conducted public meetings and hearings to inform the citizens of proposed roadway improvements and gain their feedback. Coordinated improvement project schedules with impacted groups, including municipalities, utility companies, and regulatory agencies. Trained staff on the use of computer aid design and drafting tools for improved performance of design tasks and plan production.
- 1998-2001: Civil Engineer at the Massachusetts Highway Department, Worcester, MA:** Designed signalized and unsignalized intersection reconstruction projects to improve traffic flow utilizing available traffic analysis software, including HCS, Syncro, and SimTraf. Developed conceptual designs for new interstate interchanges and new regional roadways. Conducted project reviews of consultant designs for adherence to design standards. Prepared construction bid documents. Prepared design plans using computer aiding drafting tools such as

AutoCAD and Land Development Desktop. Prepared environmental regulatory agency filings. Conducted construction inspections of private contractors to assure compliance with the contract documents. Conducted public presentations utilizing digital and non-digital media to inform citizens of proposed roadway improvements and gain their feedback.

1997-1998: **Project Engineer at Earth Tech, Inc, Concord, MA:** Prepared timing and lane configuration plans for traffic signal improvement projects. Prepared traffic signal warrant analysis. Conducted roundabout and traffic signal capacity analysis. Prepared cost estimates. Prepared design plans using computer aided drafting tools such as AutoCAD and Softdesk.

HIGHWAY IMPROVEMENT PROJECTS

1. Roadway safety assessment of multiple roads in Aurora, Illinois.
2. Design and construction inspection of improvements for Staples Hill Road in Canton, Maine.
3. Design of roadway improvements and coordination of signal timing for eleven signalized intersections along US Route 20 and US Route 202 in Westfield, Massachusetts.
4. Design of roadway and intersection improvements along Route 12 in Auburn, Massachusetts.
5. Conceptual planning of improvements to the interchange of Interstate 495 and Interstate 290 in Marlboro, Massachusetts.

6. Evaluation of alternatives for dividing the State Route 12 and US Route 20 overlap in Auburn, Massachusetts.
7. Construction inspection of the new Massachusetts Turnpike (Interstate 90) and State Route 146 interchange.
8. Development of construction bid documents for maintenance of pavement and concrete median barriers in Holden, West Boylston, Sterling, and Lancaster, Massachusetts along Interstate 190.

COURSE DEVELOPMENT AND TEACHING

1. **Multi-State In-Service Performance Evaluations (ISPEs) of Roadside Safety Hardware:** This new course provides continuing education to engineers on the procedures developed under NCHRP Project 22-33 for conducting ISPEs. Teaching is based on a combination of lectures and case studies. This course was co-taught by Dr. Carrigan to NCHRP Project 22-33 Pilot States in 2020 and 2021.
2. **Using the New and Improved Roadside Safety Analysis Program version 3 (RSAPv3):** This new course provides continuing education to engineers on the use of the Roadside Safety Analysis Program (RSAPv3). Teaching was based on a combination of lectures and case studies. Dr. Carrigan has co-taught this course at various TRB sponsored meetings in 2012, 2013, and 2014. This course was converted to a TRB webinar and co-taught in 2013. This course was co-taught to:
 - Representatives of the Florida DOT in 2015.
 - Representatives of the Washington DOT and Washington consulting firms in 2018.
 - Representatives of the Maricopa County DOT in 2019.
 - Representatives of the Florida DOT and several Florida consulting firms in 2021.
3. **Software Applications in Civil Engineering:** This new course focused on integrating practice concepts, sharing of computer-generated models/designs, project communication, and introduction of three-dimensional software modeling applications. Teaching was based on a combination of lectures and labs which represent the progression of design and drafting exercises of an industrial sub-division. The modeling-centered course was developed for sophomores, as background for inclusion of modeling concepts in junior and senior level courses and for application in junior and senior design projects. Dr. Carrigan co-taught this course at WPI during the 2008 A term and 2009 B term.
4. **Computer Integrated Methodologies in Civil Engineering:** This course was redesigned to include site and transportation software applications employed for design and construction of roads and proposed sites. Teaching was based on a

combination of literature review, lectures, and labs. Dr. Carrigan taught the site and transportation module at WPI during the Spring 2008 semester.

5. **Civil Engineering and Computer Fundamentals:** This course provided an introductory-level Civil and Environmental Engineering (CEE) course in which modules representative of the different civil engineering sub-disciplines are taught to the students. A new transportation module, including the use of AutoCAD Civil 3D, was developed to introduce basic Transportation engineering concepts, including the process of highway design, and to introduce a modern design tool which produces a graphical representation of the highway design. Dr. Carrigan taught the new transportation module at WPI during the 2008 D term.
6. **Introduction to Transportation Engineering:** This course was revised to include AutoCAD Civil 3D highway design support software. Dr. Carrigan taught this course at WPI during the 2007 A term.
