**Training Material Video Production**

Founder of the Kingdom Driving Program which focuses on CDL Class A & B training videos. The videos encompass the three parts of the CDL test required by the FMSCA to complete your CDL exam. Pre-Trip exterior and interior, Backing Skills and Driving Test. Depending on what state you are in there are either six Backing Skills that you can be tested on the standardized format or 4 on the new modernized format. Our videos breakdown the steps needed to pass the test. Currently there are not any videos that do this marketed to the public. Several schools throughout the United States have expressed their desire to acquire the videos for their program and incorporate them into their curriculum.
