

MEET OUR INTEGRATED REHAB EXPERTS:

RYAN STEPHENSON, DO

Dr. Stephenson is an Associate Professor of Clinical Practice in Physical Medicine and Rehabilitation at the University of Colorado with extensive experience in rehabilitation medicine. He has held multiple leadership roles, including Medical Director of Orthobiologics, Brain Injury, the Regional Amputation Center, and the Inpatient Rehabilitation Consultation Service.

Board-certified in Physical Medicine and Rehabilitation, Brain Injury Medicine, and Electrodiagnostic Medicine, Dr. Stephenson also holds certification as a Life Care Planner, assisting in the assessment of long-term needs for individuals with disabilities. He has provided medico-legal expert opinions in cases involving upper and lower extremity amputation, nerve injury, spinal cord injury, brain trauma, pressure ulcers/injuries, work capacity, and musculoskeletal conditions.

Clinically, Dr. Stephenson treats patients with a broad range of disabilities, pain syndromes, brain and spinal cord injuries, amputations, and both acute and chronic musculoskeletal injuries. He is also a dedicated educator, recognized for his contributions to the PM&R Residency Program, where he regularly teaches residents, fellows, and medical students.

General Specialties:

Physical Medicine & Rehabilitation, Amputation Care, Brain Injury Medicine, Certified Life Care Planner

Education:

Physical Medicine and Rehabilitation (PM&R), Baylor College of Medicine;
Certified Life Care Planner (CLCP),

Years in Practice:

15

MARYAM TAHMASBHI SOHI, MD

Dr. Sohi is an Associate Professor of Neurology and Physical Medicine and Rehabilitation at the University of Colorado. She received her medical degree from the University of Kansas School of Medicine. She completed her residency training at the University of Colorado and completed her fellowship training at the University of Kansas School of Medicine. She is board certified in Physical Medicine and Rehabilitation, Neuromuscular Medicine, and Electrodiagnostic Medicine. She has been serving as Medical Director of the multidisciplinary Amyotrophic Lateral Sclerosis (ALS) Clinics and Medical Director of the AANEM-Accredited Electrodiagnostic (EMG) Laboratories.

Her primary clinical interests include EMG, spasticity management, and the diagnosis and treatment of neuromuscular conditions. She cares for a diverse patient population affected by spinal cord injury, brain injury, peripheral nerve injuries, ALS, and musculoskeletal disorders of the spine and joints. Committed to individualized care, she develops comprehensive treatment plans tailored to each patient's needs—whether facilitating recovery, supporting return to work, managing chronic conditions, or maximizing participation in family and community life.

For over a decade, she has been actively involved in teaching and training medical students, residents, and fellows. She has delivered presentations at regional and national conferences, published multiple academic articles, and served as an ad hoc reviewer for accredited medical journals. Her research focuses on adverse events in interventional pain management, as well as the development of practice parameters and quality improvement initiatives for complex medical conditions.

General Specialties:

Physical Medicine & Rehabilitation, Neuromuscular Medicine, Electrodiagnostic Medicine

Education:

MD- University of Kansas School of Medicine

PM&R- University of Colorado Anschutz Medical Center

Fellowship- University of Kansas School of Medicine- Department of Neurology

Years in Practice: 12

JARED RAMMELL, CPO

Jared is a trusted expert in orthotics and prosthetics, with over a decade of experience recognized for his knowledge, attention to detail, and collaborative approach. As an advanced practitioner, he provides expert clinical care, consults on complex cases, and contributes to national policy and education initiatives.

Jared spent over three years at the Shirley Ryan AbilityLab (formerly the Rehabilitation Institute of Chicago), one of the nation's preeminent rehabilitation facilities, where he worked with complex amputation cases, neuromuscular conditions, and advanced prosthetic technologies. His experience there deepened his expertise in cutting-edge prosthetic design, rehabilitation strategies, and interdisciplinary collaboration, shaping his approach to patient care and clinical consultation.

Jared is dedicated to delivering the highest quality care and advocating for his patients. His in-depth knowledge of regulatory standards—including HCPC coding, CMS compliance, and accreditation requirements—ensures accuracy and reliability in every aspect of his work. Valued for his professionalism and easygoing nature he fosters strong relationships across multidisciplinary teams, ensuring seamless collaboration and the best possible outcomes.

Building on his clinical expertise, Jared is developing his role in medico-legal consulting, aiming to provide objective, evidence-based analysis in prosthetic and orthotic cases. He offers unbiased assessments for both plaintiff and defense counsel, ensuring that his evaluations are rooted in clinical best practices and industry standards. His balanced approach allows for clear, defensible opinions, helping attorneys, insurers, and other stakeholders navigate complex prosthetic and orthotic considerations with confidence.

General Specialties:

Clinical Prosthetics and Orthotics, Amputation Rehabilitation

Education:

Master of Science in Orthotics and Prosthetics, Baylor College of Medicine • Houston, TX

Bachelor of Arts in History, Boise State University • Boise, ID

Years in Practice:

JASON KACMARSKI, PHD

Dr. Kacmarski is a Board-Certified Clinical Neuropsychologist with extensive experience in evaluating and treating individuals with acquired brain injury, complex medical conditions, and psychiatric comorbidities. He serves as the Coordinator of Neuropsychology Services for the VA Eastern Colorado Health Care System, Medical Director of Neuropsychology at PAM Specialty Hospital of Denver, and owner of Archway Neuropsychological Services. His clinical work includes differential diagnosis of neurodegenerative conditions and comprehensive assessment of cognitive and emotional functioning in individuals with neurological disorders such as multiple sclerosis and epilepsy.

In addition to his clinical roles, Dr. Kacmarski is actively involved in training psychology interns and fellows, emphasizing the critical role of assessment in understanding how individuals' strengths and weaknesses shape their challenges and treatment needs.

Dr. Kacmarski is also expanding his work in medico-legal neuropsychology, providing assessments in cases involving cognitive impairment, traumatic brain injury, and psychological functioning. His evaluations contribute to disability determinations, capacity assessments, and forensic consultations, ensuring that his findings are grounded in clinical best practices and objective analysis.

General Specialties:

Clinical Neuropsychology- Board Certified

Education:

Doctor of Philosophy in Counseling Psychology, University of Northern Colorado

Years in Practice:

9
