University of Miami School of Medicine Affiliated Faculty Department of Surgery

PRACTICE SUMMARY:

1976 to 2017) : Active private practice of Adult Cardiac, Thoracic and Vascular Surgery

2017 to current: Active practice of Thoracic and Vascular Surgery

Cardiac, Vascular and Thoracic Trauma: During my residency in General Surgery and then fellowship in Cardiac, Thoracic and Vascular surgery in Miami, a Level I trauma center. My practice years at Broward County General Hospital were intimately involved with Trauma in a Level I Center and in Palm Beach County at Delray Medical Center, this is also a Level I center in which I have been very active. During all my **years of Cardiac Surgery were in hospitals WITHOUT intensivists thus** I delivered all Critical Care management of these patients. Additionally my medical experience has been quite broad not only from a specialist viewpoint but that of a "diverse" physician. This allows me to "read between the lines" and note comments and omissions that are frequently not readily appreciated. I would like to put my experience and clinical knowledge to work in the field of medical law review. My mind is open and inquisitive and despite the lack of high university titles and journal publications my understanding and knowledge of "real life" clinical situations should serve me well for this type of work. Please feel free to contact me via email or cell phone.

email: drs3051@comcast.net cell: 561-716-6151. Thank you for your consideration.

Robert Blais, M.D. Robert Blais
